## 2011 Share Hosting Price List

### **Basic Share Hosting includes:**

1 Self-Managed Installation of Wordpress, 1 Domain Name, 5 Email Addresses with no capacity limits

**\$50/year paid annually**

*Save \$10 by registering your own domain with a provider of your choice!*

YOU SAVE OVER \$57 VERSUS YOUR OWN ACCOUNT

**Additional Email Addresses?** \$2/year per additional email address

### **Pros**

- Share Hosting packages are low cost solutions for folks needing a blog or a website, and are willing to put in a little 'sweat equity' to get it going
- You get to design it all: no designer to tell you what you should be doing
- No one gets paid just because you want to make a minor change to some wording!
- The site is powered by Wordpress, a powerful blogging software with thousands of free, one-click installable themes and plugins

### **Cons**

- Building a site to still look professional requires some patience and basic technological understanding
- There is no design assistance from MMC, you're reliant on Google and Wordpress Documentation
- If it breaks, you get to fix it
- Share hosting does not include design work or setup, except for the installation of the backend software
- Share hosting does not include support for creating a website
- Share hosting does not include graphic design work

If you're willing to put in a little work to have a great looking website, you can save hundreds of dollars over working with a designer or hosting your own site. The best part is, the site is hosted on your own domain name!
